

### **Providing Expert Assistance for Complex and International Disputes at Gartner Law & Consulting**

In the realm of intricate, global conflicts stemming from complex transactions, arbitration often emerges as a superior alternative to national courts, which may not be suitably equipped or available to resolve such disputes.

At Gartner Law & Consulting, we specialize in representing clients in commercial arbitration proceedings and their associated court actions and enforcement measures. Our expertise extends to both ad hoc and institutional arbitrations, governed by Swiss or foreign law. We boast a wealth of experience in proceedings administered by prestigious arbitral bodies. Within our arbitration team, our members assume pivotal roles as party-appointed arbitrators, sole arbitrators, and tribunal chairpersons.

Our international arbitration team's exceptional quality, size, and experience enable us to handle substantial and intricate cases. Our portfolio encompasses diverse areas such as international acquisitions, joint ventures, privatizations, R&D, technology transfers, financing, sales of goods, construction and large-scale projects, commodity trading, sports arbitration, oil and gas, as well as IP/IT disputes.
